

# THE NEW PREVENT EZ-RAIL SYSTEM™

Introducing the NEW, patent-pending  
PreVent EZ-Rail mounting option.  
EZ-Rail makes removing or replacing  
your PreVent air intake filters from  
fresh air louvers easy—without  
any extra equipment or tools.

**PREVENT**®

# THE BENEFITS OF THE NEW PREVENT EZ-RAIL SYSTEM

## EZ IN, EZ OUT

Easily slide your PreVent air intake filters in and out of the track system for critical cleaning or equipment maintenance.

## NO LADDERS OR LIFTS

After installation, removing and re-inserting your PreVent air intake filters from tall, hard-to-reach HVAC fresh air louvers is easy.

## INNOVATIVE DESIGN

Our always customized PreVent Models U or BHA filters will feature vinyl framing with PVC cords, designed specifically to fit our EZ-Rail track tightly and securely, with minimal air bypass.

## IDEAL EQUIPMENT PROTECTION

When installed, these PreVent air filters protect the vulnerable components inside your HVAC equipment from dirt, debris and bugs. Prefiltering also extends the life of high-efficiency interior air filters.

## EASY INSTALLATION

High-strength anodized aluminum rail track supports screw into the louver frame on your equipment enclosure, making installation simple.

## LONG LASTING QUALITY

The PreVent EZ-Rail system comes with a 5-year warranty.
