The key components of a truly efficient unit are on the inside. Engineering expertise enables our Accumulator Chamber design to:

- Resist particulate buildup on the surface to maintain adequate air flow
- Maintain a low resistance to air flow for more balanced heating and cooling
- Increase the air filter’s dust holding capacity
- Promote maximum arrestance performance and easy/thorough cleanability

Ultimate Allergy Filter

- Lifetime warranty
- Stainless steel frame and wire support
- Initial resistance 0.16” w.g. @ 300 FPM (1200 CFM) air flow
- Average arrestance efficiency 91% contains an added layer of nonwoven polyester for maximum performance
- Dust holding capacity 160 grams
- Air Filter Unit Classified As to Flammability Only 655U
Gives You An *Inside* Advantage...

... *with our Exclusive*

**ACCUMULATOR CHAMBER® Design**

The key components of a truly efficient unit are on the inside. Engineering expertise enables our Accumulator Chamber design to:

- Resist particulate buildup on the surface to maintain adequate air flow
- Maintain a low resistance to air flow for more balanced heating and cooling
- Increase the air filter’s dust holding capacity
- Promote maximum arrestance performance and easy/thorough cleanability

---

**Low Air Flow Resistance**

- Lifetime warranty
- Stainless steel frame and wire support
- Initial resistance 0.11” w.g. @ 300 FPM (1200 CFM) air flow — ideal for heat pumps, sensitive 90+ furnaces and systems with limited air flow
- Average arrestance efficiency 82%
- Dust holding capacity 105 grams
- Air Filter Unit Classified As to Flammability Only 655U
