

MODEL

MODEL #MountPlate

## FEATURES

For non-metal surface installations of PreVent® filters with MagnaMount®, use press on steel plate adapter. Mount Plate utilizes double-sided, high bond adhesive tape for peel and stick installation on equipment. This tape is capable of absorbing the differing thermal expansions of two different materials, and also maintains a high impact resistance even at temperatures ranging from -40°F to 212°F.

Ensure bonding surfaces are well unified, clean, dry and free of dirt and oils. Apply firm and even pressure to improve adhesive-to-surface contact. Allow proper temperature and time to enhance bond strength as adhesive flows onto the surface

## PRODUCT DETAILS

- Available in a bag of 15 plates
- Recommended temperature use: 50°F to 100°F
- Excellent weathering properties, including moisture and sub-zero temps
- Resistant to high temperatures
- Continuous bond distributes stress over entire surface
- Fast and easy assembly
- UV resistant
