

## Contractor's Choice Air Filter

Contractor's Choice filters the air with a very low air flow resistance. Low air flow resistance is extremely important in the proper operation of today's high efficient heating and cooling systems. Low resistance means better circulation. Test based on ASHRAE protocol resulted in .08 inches W.G. at 300 FPM.

### Contractor's Choice Low Airflow Resistance Filter Provides

- ✓ Lower energy costs
- ✓ Reduces possibility of expensive service calls
- ✓ Improved air circulation & temperature control throughout your home
- ✓ Faster heating and cooling
- ✓ Decreased possibility of frozen air conditioning coils
- ✓ Extends life of compressor and blower motor
- ✓ Lifetime warranty

#### *Humidity Proof*

*Only non-absorbent materials are utilized in the construction of Contractor's Choice. Relative humidity does not affect efficiency.*
