

HailStop[®]
Hail Guard Netting

WHAT'S HAIL DAMAGE COSTING YOU?

HailStop Hail Guard Netting:

Lightweight and easy to install, the rigid plastic netting deflects airborne objects and debris such as hail. Unique mount clips are easily attached to the equipment. HailStop fits onto clips and the moveable tab closes into locking position. Sold in single job kits and master rolls, netting can be cut-to-size with scissors or a utility knife. Netting can be used alone as hail guard or layered behind Prevent[®] Equipment Protection Filters for added air intake protection.

Hail causes serious damage to HVAC Equipment:

- Flattens Fins
- Reduces Air Flow
- Replacing or Repairing Costly Coils
