

The logo for PREVENT, featuring the word "PREVENT" in a bold, sans-serif font. A vertical line is positioned between the "PRE" and "VENT" parts, and a small registered trademark symbol (®) is located at the end of the word.

PREVENT®

A black, rectangular air filter with a fine, woven mesh texture. It has a black plastic frame. A circular, silver-colored metal component is visible on the right side of the filter.

SIMPLE, powerful filters.

A black, rectangular air filter with a fine, woven mesh texture. It has a silver-colored metal frame. A circular, silver-colored metal component is visible on the left side of the filter.

SIMPLER magnetic, no-drill mounting.

THE PreVent SYSTEM. Simply your best choice.

CUSTOM-MADE FILTERS for every air intake.

Easy-to-install. Custom-fit to stop airborne debris before it ever gets inside your HVAC coils and fins. The PreVent system is designed to fit your equipment and your needs—extending its life and saving you money on maintenance, energy and service.

Simply, the PreVent air filtration system is built for you. These prefilters can be customized to meet any equipment air intake, fresh air filter rack or ventilation inlet and outlet challenge—including those requiring pipe and electrical cutouts or special shapes. Plus, every filter comes with a five-year warranty.

Only air gets through PreVent filters.

Save on energy costs—equipment with dirty coils can use as much as 37% more energy than units with clean coils

Clean in minutes with a brush or hose

Protect all equipment, from icemakers to extra-large cooling towers

Will not shed fibers, absorb moisture or promote bacterial growth

Stands up to weather, UV rays, extreme temperature, corrosive chemicals and high-velocity air flow

Single and double-layer media construction

INSTALL IN MINUTES with magnets.

The unique PreVent system is a snap to install. Literally. Our innovative system requires no drilling or tools. Magnets mean our filters can be easily installed or removed in minutes, with no special service or equipment shutdown needed.

No metal? No problem. You can adhere our filters using a steel plate adapter with high-bond, high-tensile strength tape adhesive that can be affixed permanently to the surface.

Exceptional MagnaMount® strength.

Sold in packages of 12, these powerful, patented neodymium “earth” magnets are extremely strong. They are tested to hold 11 pounds in a single, horizontal, straight-down pull.

Model R magnetic stripping.

This customizable rigid, steel-framed, magnet-affixed filter is intended for interior use or protected outdoor positions.

THE BEST SERVICE. The fastest turnaround.

Our products are made in the U.S.A. Each PreVent filter is custom-designed and manufactured on-site at our factory. Plus, we have the fastest turnaround time in the industry.

But faster turnaround is only part of our exceptional support. For over 60 years, Permatron has delivered the best in innovative air filtration solutions for commercial equipment. Our dedicated sales and support team is known for their superior customer care, and are available to help with product consultation, measuring and ordering. We know one size does not fit all. That's why we provide our customers with a complete air filtration solution built for their unique requirements.

NOTHING IS STRONGER.

Unmatched for strength and durability, PreVent filters will stand up to the most extreme outdoor and indoor exposure. Our filters are crafted from fabrics chosen for low air flow resistance and high debris holding capacity. Better filtration means cleaner coils, improved energy efficiency and improved equipment performance.

“By using the PreVent filters, we've reduced our seasonal filtration costs by almost 70% and our maintenance and cleaning man-hours are about a third of what they were with the old filtration equipment.”

ANGELO CARRIERI

MODEL U

EZ IN, EZ OUT: The PreVent EZ-Rail System™

Our PreVent EZ-Rail mounting option installs quickly and makes critical cleaning and equipment maintenance easier than ever.

NO LADDERS OR LIFTS

PreVent air intake filters slide in and out of the track system, making removing and re-inserting them from tall, hard-to-reach HVAC fresh air louvers fast and easy.

INNOVATIVE DESIGN

Our always customized PreVent Models U or BHA filters will feature vinyl framing with PVC cords, designed specifically to fit our EZ-Rail track tightly and securely, with minimal air bypass.
