

MODEL

MODEL #PREVENT-CTFS

FEATURES

The Cooling Tower Filter System (CTFS) is a new mounting option for installing PreVent® BHA filters over large equipment air intakes. The CTFS mount kit includes all items from the parts list and a detailed installation guide.

Permatron's CTFS makes it simple to clean extra large PreVent screen installations on cooling towers. Simply lower the screen to clean in place by brushing with a broom, and then lift it back up into place.
