

## PREVENT® FLEXIBLE AIR INTAKE FILTER

MODELS	U1	U2	BHA
Initial Air Flow Resistance	0.04" w.g.	0.06" w.g.	0.06" w.g.

### FEATURES

Acts as a primary pre-filtration defense to help prevent the damage and extensive maintenance that large volumes of airborne dirt and debris can cause. Model U and Model BHA are custom designed and manufactured to fit any sized air intake.

**Model U** filter is constructed of washable three-dimensional electrostatic polypropylene BHC media and encased in a 1-1/4" sewn vinyl edge with double stitching. Model U1 contains one layer of BHC media or Model U2 contains two layers of BHC media depending on the application's environmental particle size.

**Model BHA** filter is constructed of one layer of washable black PVC coated polyester high abrasion media and encased in a 1-1/4" sewn vinyl edge with double stitching.

### PRODUCT DETAILS

- Independent testing by UL Laboratories showed PreVent Filters cause less than 1% change in system discharge pressure.
- Can be affixed to unit with hook/loop stripping, grommets with mount clips, elastic bungee hooks or magnetic stripping inside vinyl edging
- Fits any equipment, specify size
- Sewn 2.5" vinyl edge (folded to 1-1/4")
- Custom electrical or pipe cut outs available
